FIG. 8

FIG. 9

FIG. 9 is a line graph showing the percentage of epoxide depletion over time for three different conditions: LD5, LD4, and H4A. The y-axis represents the percentage of epoxide depletion, ranging from 0 to 100. The x-axis represents time in hours, ranging from 0 to 30. LD5 shows the highest depletion rate, reaching approximately 95% at 18 hours. LD4 shows a moderate rate, reaching about 10% at 4 hours. H4A shows the slowest depletion rate, reaching about 60% at 4 hours.
